QUALIFICATIONS

- Competent full-stack web developer with experience developing large scale applications in a fast paced environment.
- Detail oriented with a background in Object Oriented Programming and the software process including specification, user interface design, development, quality assurance, maintenance, and production support.
- Focused and committed to producing clean, well-documented software.
- Versatile and adaptive with the ability to work on varying projects simultaneously.
- Able to provide support through troubleshooting and effective communication.
- Capable of quickly learning technologies through independent research.
- Eager to apply and provide feedback to improve personal performance as well team productivity.

EXPERIENCE

Independent Professional

CONSULTANT & FAMILY CAREGIVER

MAY 2014 – PRESENT

- Prepared data for a digital product archive by scanning physical source documents, editing images with Photoshop, transcribing text descriptions with a batch OCR application written in Python, and manually validating transcribed text.
- Developed a MS Excel product archive through manual data entry, selection from data validation tables, and automatic filling formulas that compose and format data.
- Implemented a data-driven archive website using WordPress Content Management System (CMS) featuring a product custom post type with associated taxonomies and display templates, and database import from a MS Excel generated Comma Separated Value (CSV) file.
- Designed, implemented, and maintained a semantic, responsive, and accessible brochure website with custom template and logo design using Photoshop, vanilla JavaScript, and pure CSS.
- Organized and manually transcribed confidential client data from a backlog of paper federal tax documents into TaxAct.
- Provided comprehensive care management for family member including managing medical schedules, billing, and budgeting.
- Resolved an estate by cataloging and inventorying assets with custom Excel spreadsheets; liquidated assets through online marketplaces, researching pricing strategies, managing item listings, fulfillment, and customer service.

Dovetail**Parsippany, NJ****USER INTERFACE ARCHITECT****OCTOBER 2012 – APRIL 2014**

- Subject Matter Expert (SME) for the User Interface (UI) of a large scale web-based Automated Clearing House (ACH) software application.
- Collaborated with business analysts to prepare high level User Experience/User Interface (UX/UI) designs composed of flow charts, UML diagrams, and wireframe mockups that align with business requirements and system architecture.
- Approved UI project designs and deliverables for adherence to application architecture, frameworks, design patterns, and coding guidelines.
- Maintained user interface framework documentation by enforcing updates as a requirement for project deliverables, and reviewing for accuracy.
- Provided troubleshooting guidance and hotfixes for critical production issues via onsite and remote technical support.

TECHNICAL ARCHITECT**AUGUST 2010 – OCTOBER 2012**

- Analyzed high level business and technical requirements to create detailed system designs, project timeline estimates, and developer resource requirements.
- Organized project status meetings, maintained project schedules, and validated project implementation via code reviews and regression tests.
- Managed product releases by merging feature branches with release branches using CVS and Mercurial, and assembling application files and regression test results for delivery to clients.
- Provided onsite software integration support by tracking the resolution of critical issues and familiarizing clients with application functionality.

JAVA DEVELOPER**JUNE 2007 – AUGUST 2010**

- Utilized the Model-View-Controller (MVC) architectural design pattern to build data driven server-side business logic with Enterprise Java Beans (EJB), controller Struts Actions, and front-end user interfaces with JSP, JSTL, and Struts tiles.
- Interpreted use cases to implement JUnit unit tests that correlate with business requirements.
- Resolved and documented defects by performing root cause analysis, implementing and validating fixes, creating or updating unit tests, and providing client-facing details for release notes.

RightAnswers, Inc.**Clark, NJ****SOFTWARE DEVELOPER****MAY 2003 – APRIL 2007**

- Designed a web interface to facilitate outsourced content creation for import into proprietary Knowledge Base application using ASP/VBScript, JavaScript, HTML, and CSS.
- Developed MS Excel macros using Visual Basic and MS Office API to automatically execute instructions described by Knowledge Base content.
- Managed outsourced development of Microsoft Office macros by approving user interface mockups, conducting code reviews, quality assurance testing, and providing guidance.

- Devised and implemented solutions for integrating a proprietary Knowledge Base with Help Desk applications using Perl to parse and format content, and JavaScript to initiate searches and inject retrieved content into web forms.
- Provided technical support to clients and the sales team for software installation, troubleshooting, and sales demonstrations.

Websoft Systems, Inc.

Red Bank, NJ

WEB DEVELOPER

SEPTEMBER 2002 – MARCH 2003

- Transformed high fidelity mockups into functional web designs focusing on usability and cross-browser compatibility using Dreamweaver and Photoshop.
- Designed and developed web forms to capture and maintain user data using MS Access, ASP, JavaScript, HTML, and CSS.
- Composed and edited software user manuals and system guides in MS Word, ensuring consistent structure, formatting, and audience appropriate language.
- Translated client e-learning content into a uniform format for migration into proprietary Learning Content Management System (LCMS).

EDUCATION

New Jersey Institute of Technology

Newark, NJ

TECHNICAL COMMUNICATIONS AND VISUAL DESIGN

SEPTEMBER 2013 – DECEMBER 2014

6 Graduate credits

New Jersey Institute of Technology

Newark, NJ

M.S. IN INFORMATION SYSTEMS

SEPTEMBER 2005 – MAY 2007

Harrison Career Institute

Eatontown, NJ

CERTIFICATE IN PC SUPPORT/NETWORKING

OCTOBER 2001 – APRIL 2002

University of Delaware

Newark, DE

B.S. IN COMPUTER AND INFORMATION SCIENCES

SEPTEMBER 1997 – MAY 2001
