N.A. WEDDERBURN

WEB DEVELOPER

nawedderburnwebdev@gmail.com
nawedderburnwebdev.github.io/portfolio

QUALIFICATIONS

- Competent full-stack web developer with experience developing large scale applications in a fast paced environment.
- Detail oriented with a background in Object Oriented Programming and the software process including specification, user interface design, development, quality assurance, and maintenance.
- Focused and committed to producing clean, well-documented software.
- Versatile and adaptive with the ability to work on varying projects simultaneously and provide technical support through troubleshooting and effective communication.
- Capable of quickly learning technologies through independent research.
- Eager to apply and provide feedback to improve personal performance as well team productivity.

TECHNICHAL SUMMARY

Development: Java, JSP, Struts, JavaScript, HTML, XML, CSS

Databases: Oracle, Microsoft SQL Server

Software: Visual Studio Code, Eclipse, Intellij Idea, Microsoft Office Suite (Word, Excel, PowerPoint, Outlook)

Platforms: Windows 10/7/Vista/XP/2000/9x/NT

EXPERIENCE

USER INTERFACE ARCHITECT OCTOBER 2012 – APRIL 2014

- Subject Matter Expert (SME) for the user interface development of a large scale web-based Automated Clearing House (ACH) software application.
- Research implementation requirements and strategies to prepare high level designs composed of flow charts, UML diagrams, and screen mockups that are used as a basis for further detailed design and development.
- Collaborate with system architects and business analysts to determine the implementation of user interface requirements that will align with system frameworks.
- Prepare implementation estimates used by project managers to plan project timelines and delivery dates.
- Review user interface designs and implementations and provide technical direction for adherence to system frameworks and design patterns.
- Maintain user interface framework documentation and project implementation artifacts.
- Respond to critical production issues for clients via onsite and remote technical support.

TECHNICAL ARCHITECT AUGUST 2010 – OCTOBER 2012

- Provided technical direction for up to 5 developers in fast-paced environment on simultaneous deliverables.
- Analyzed high level business and technical requirements to create detailed system designs.
- Scoped and estimated project timelines and determined required developer resources.
- Organized and lead project status meetings and maintained project schedules.
- Validated project implementation via code reviews and regression tests.
- Merged new feature code with release branches using CVS and Mercurial.
- Updated system configuration guides based on new functionality.
- Provided onsite client Quality Assurance testing support.

JAVA DEVELOPER JUNE 2007 – AUGUST 2010

- Utilized the MVC pattern to build database driven server side business logic with Enterprise Java Beans (EJB), controller Struts Actions, and front end implementation with JSP, JavaScript, HTML, and CSS.
- Interpreted Use Cases to build product screens using JSP, JSTL, and Struts tiles.
- Built and executed regression tests based on system requirements using JUnit.
- Resolved technical and functional defects by performing root cause analysis through code research and debugging, making appropriate modifications, and verifying desired results.

ENVIRONMENT

Java, JSP, Struts, jQuery, AJAX, Eclipse Helios, Apache ANT, Intellij Idea 10, Visio 2007, StarUML, UMLet, Balsamiq Mockups, Weblogic (9,10,12), WebSphere 7, Oracle (10, 11), Mercurial, CVS, Atlassian applications (Confluence, JIRA, Crucible, Fisheye), Jenkins, JavaScript, XML, JUnit, MS Word, MS Excel, MS PowerPoint.

SOFTWARE DEVELOPER MAY 2003 – APRIL 2007

- Managed outsourced development of Visual Basic 6 ActiveX macros for Microsoft Office 2003 by verifying user interface mockups, providing technical assistance, code review, and quality assurance testing.
- Built a web-based Content Management application for outsourced Knowledge Base content development using ASP/VBScript and JavaScript.
- Devised and implemented solutions for integrating a proprietary Knowledge Base with Help Desk applications using custom JavaScript and content parsing and formatting using Perl.
- Developed and maintained server-side and front-end components for proprietary Knowledge Portal application using JSP scriptlets.
- Provided technical support for clients and sales team for software installation, troubleshooting, and sales demonstrations.

ENVIRONMENT

Java, JSP, Microsoft SQL Server, JavaScript, Visual Basic 6, ASP, Perl, XML, HTML, CSS, Macromedia Dreamweaver MX, Microsoft Office API 2000/2002/2003, MS Word, MS Excel, MS PowerPoint, MS Access.

WEB DEVELOPER SEPTEMBER 2002 – MARCH 2003

- Transformed image mockups into functional web designs, focusing on usability and multiple browser compatibility.
- Created ASP scripts to capture website user information from HTML forms and provide website login functionality.
- Translated client e-learning content into sleek and uniform format for migration into a proprietary Learning Content Management System.
- Developed software documentation including user guides and reference manuals.
- Assisted in delivering onsite client training on a proprietary Learning Content Management System.

ENVIRONMENT

ASP, JavaScript, HTML, CSS, Macromedia Dreamweaver MX, Adobe Photoshop 6, MS Access, MS Word.

EDUCATION

TECHNICAL COMMUNICATIONS AND VISUAL DESIGN SEPTEMBER 2013 – DECEMBER 2014
6 Graduate credits

M.S. IN INFORMATION SYSTEMS SEPTEMBER 2005 – MAY 2007

CERTIFICATE IN PC SUPPORT/NETWORKING OCTOBER 2001 – APRIL 2002

B.S. IN COMPUTER AND INFORMATION SCIENCES SEPTEMBER 1997 – MAY 2001
